

September 15, 2008

Dear Charles,

I wanted to take a moment to tell you how happy I am with the ePiano system and also thank you for doing a great job with the installation. As a pianist who has been playing professionally and teaching for almost 20 years it was really important to have a quality product, and ePiano really delivered.

I already had a full sized digital Roland keyboard and you were able without issue to add the ePiano software to my existing system. The sound capability of the ePiano is wonderful. My students really enjoy creating new sounds each week as they warm up before their lessons and exploring the infinite variations of sound using the soundsetter software.

We also regularly explore theory during group and performance classes using the Musication pro software. The games are fun and very educational.

As a musician I love the ePiano Record Now software feature found under Create Music. It is literally a 3-click process that is easy and straightforward to use and the quality is superb. I have been able to record directly from my keyboard and download onto CD and I could also email the files or send them to my MP3 player.

The ePiano platform allows other software to be added easily as well. I just installed Sibelius by myself a few weeks ago and am looking forward to using it in conjunction with the features I already have like Cakewalk recording studio for multi-track recordings.

Both my students and I love the possibilities the ePiano allows on a daily basis. I would recommend this system to any professional teacher or organization that would want to expand their studio experiences and further musical potential.

Thank you again for all your help and expertise.

Yours,

Houry Schmeizl
